## “FY students went through their Outdoor Management Training (OMT)”

Sept 1, Thursday: Outdoor Management Training was organized by IIMP BBA for the fresher batch of 2022-2025. OMT is an approach towards leadership growth and team-building. It involves several tasks and activities conducted outdoors, that serve the purpose of facilitating management development. This enables students to learn and develop the skills needed to study effectively.

The OMT at IIMP had 2 games: Acid walk and Ship & Shepherd. The Acid walk activity stimulates critical thinking and problem-solving skills; whereas the Ship and Shepherd provide outcomes such as communication, leadership, problem-solving, resilience and trust. Both the activities were to be played forming teams. This not only facilitated the purpose of OMT but also, helped the students to know about their batch mates

## What is monkey pox?

Monkeypox, which was first discovered in the Democratic Republic of Congo in 1970, is endemic in humans in nine African countries but this year's outbreak reflects its spread in non-endemic countries, thereby signifying increased community transmission of the infection.

## Vaccinations to rescue?

WHO has not recommended mass vaccination against the spreading virus, but in May this year the United States began to administer smallpox vaccines, which are considered effective against monkeypox. Amid escalating case numbers, the European Union has recommended smallpox vaccine- Imvanex- to be authorised against monkeypox.

### MONKEYPOX SYMPTOMS LASTS BETWEEN 2-4 WEEKS
