Today, research and consultancy has emerged as an industry of its own and offers excellent career avenues. Professional level understanding of the fundamental concepts in its methodology and exposure to the real practices holds the key to success in research and consultancy in social, behavioral and management science domains.

**PGRC, Indira Institute of Management, Pune** had organized a comprehensive three day non-residential professional training programme in Research Methodology in which the fundamentals of research methodology were explained. The workshop also included BRM and detailed use of SPSS / AMOS. Around 25 participants attended the workshop.

The resource person for this workshop was Dr. Sher Singh Bhakar, Director, Prestige Institute of Management, Gwalior; a person who has conducted numerous such workshops along the breadth and length of India.

The first day was devoted to class room session during which various concepts related to RM were covered right up-to how to write a thesis.

The second and third day was devoted to hands on training in SPSS and AMOS wherein the trainer took us through all the parametric and non-parametric tools for uni-variate and bi-variate studies and selected tools from multivariate studies including Exploratory Factor Analysis, Confirmatory Factor Analysis, Structural Equation modeling, multiple regression analysis, Two way and n-way ANOVA, MANOVA, ANCOVA, MANCOVA, Cluster Analysis, Multidimensional Analysis, Multidimensional scaling, Conjoint analysis and Canonical Correlation.

Few photographs of the workshop are given below
Dear Sir,
Thanks a lot for arranging the session and making us part of it.
Thanks & Regards-
Swapnil Dongardive.
Asst Professor,
Indira Institute of Management Pune

Dear Sir,
We enjoyed the session.
I have attached filled feedback form for the training.
Thank you so much for giving chance and opportunity to us to attend the training.
Looking forward for further events in IIMP

Regards,
Amruta Deshpande

Dear Abhijit Sir,
Let me take this opportunity to thank your perseverance and sincerity in arranging these valuable sessions for PhD Scholars and aspirants registered with Indira’s PGRC.

In the last 6 months, you have arranged more than 3 - 4 sessions, related to questionnaire design, Research Methodology, SPSS etc. and all of them were well timed and by excellent faculties / SMEs in the area. One must appreciate your and the Institutes’ efforts in creating value and enriching knowledge through experiential learning’s.

Dr. Bhakar’s session on SPSS was a fabulous session and kept us all on our toes, with his hands on knowledge and rapid pace (Needless to say, the infra arrangements and other softer aspects are also managed really well by you)

Not sure if other institutes are involved in such ‘real programs’ - I understand from one of my colleagues in Tech Mahindra (who happens to be a research scholar with a reputed institute on Film Inst. Road – no such programs have been conducted ever for them)

Thanks to you, Dr. Mali Sir and Dr. Renu ma’am for providing us with such learning platforms; appreciate this!

Warm Regards,
Sughosh Tembre
